

Davidson Seamount

1. All public scoping concerns/comments about extraction activities from the bottom habitat of the Davidson Seamount should be referred to the PFMC. Period.
2. Any concerns about protection of the bottom fishing or habitat for the Davidson Seamount should be referred to the PFMC with a recommendation to make it a Federal MPA, prohibiting all bottom extraction.
3. The fishing community does not support making the Davidson Seamount a part of the MBNMS or creating a new NMS around it.

Krill Harvesting

1. Fishermen will support a strong recommendation to be made to the PFMC to prohibit krill harvesting within the Sanctuary.
2. Fishermen do not support any MBNMS actions that will require a change in the Designation Documents regarding their role in fishery management.

Bottom Trawling

1. All public concerns/comments about bottom trawling heard during the scoping process should be referred to the PFMC.
2. A MBNMS assessment of the impacts to the bottom habitat and fisheries from bottom trawling will be supported if it is scientifically and objectively conducted, utilizing the knowledge of experienced trawl fishermen in all phases. The results of this study would be forwarded to the PFMC for their consideration and potential action.

Fishermen/Education/Research

1. Support the recommendations of the work group.
2. Add: The ACSF request the ability to comment on the text of MBNMS publications before they are printed.

MPAs

1. All public scoping comments for or against the establishment of fishing-restrictive MPAs within the MBNMS should be forwarded to the CDFG and the PFMC. Period.
2. As there was no consensus for the workplan developed by the SMPAWG, refer it back to the workgroup until there is consensus.
3. Adopt the Action Plan, adding to it the guidance of the "road map" found in the May 29, 2003 letter to Holly Price, from fishing and harbor representatives on the SMPAWG.

SAC

1. Create a work group involving AMBAG, Congressman Farr's office, current and former SAC members, etc., to resolve this issue.
